Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, drawn to an electronic camera having the capability to frame feed and frame rewind image data is classified in class 348, subclass 231.2.
- II. Claims 3, 15, and 34 drawn to an electronic camera with a mode selector for selector switch that selects either a recording mode or a reproduction mode is classified in class 348, subclass 231.99.
- III. Claims 4-5, 8-10, 19-29, 30-33, and 35 drawn to an electronic camera with a signal processing circuit and a control circuit is classified in class 348, subclass 222.1.
- IV. Claims 6-7 drawn to an electronic camera with exposure control is classified in class 348, subclass 221.1.
- V. Claims 11-14 drawn to an electronic camera with magnification adjustment circuit is classified in class 348, subclass 240.99.

VI. Claims 16-18 drawn to an electronic camera with a sub-sampling circuit is classified in class 348, subclass 229.1.

Inventions I, II, III, IV, V and VI are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combinations as claimed do not require the particulars of the subcombinations as claimed because each invention involves a different method of image signal processing in a digital camera.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2612

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
